

WIDE BAND COUPLER TEST REPORT

QUALIFICATION: TELCORDIA GR-1209-CORE

TESTED BY: **yanchao huang**

APPROVED BY: **yongming qi**

DATE: **November, 2011**

1. Purpose:

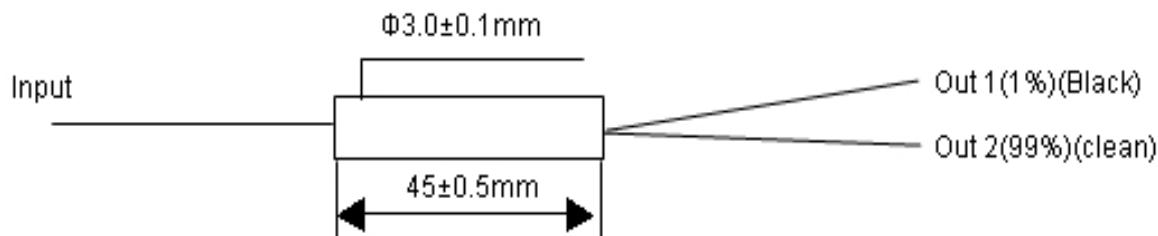

The Purpose of this qualification test is to demonstrate the PuHuiXing technology Co., LTD optical fiber wide band coupler meet the TELCORDIA GR-1209-CORE specifications. And qualify PuHuiXing technology coupler manufacturing processes.

Note: Telcordia Technologies Generic Requirements GR-1209-CORE Issue 4, September 2010

2. Sample description

All the samples used in this qualification test were manufactured at PuHuiXing technology product line in July 2011. The 1550nm wide band coupler (WBC) with coupling ratio of 1/99 were built according to company standard manufacture processes and met the product specifications. Eleven devices in total were randomly picked from the product line.

3. Device Configuration (Unit: mm)

4. Test Equipment

All test and measurement equipment are within the manufacturer suggested calibration period and were certified by the relative calibration centers in China.

- (1) Temperature and humidity chamber (RGDJ-150)
- (2) Optical spectrum analyzer (Ando AQ6317B)
- (3) Optical power meter (Ando Q8221)
- (4) Stable optical light source (PuHuiXing technology Co., LTD 1550 DFB-LD)
- (5) Fusion splicer (Fujikura FSM-60S).

5. Environmental and Mechanical Test Including:

- Temperature-Humidity Aging Test
- Temperature-Humidity Cycling Test
- Water immersion Test
- Vibration Test
- Side Pull Test
- Cable retention Test
- Impact Test

6. Environmental and Mechanical Test Conditions:

6.1 Temperature-Humidity Aging Test

Temperature	85 ± 2 °C
Humidity	85 ± 2 % RH
Test length	14 days (336 hours)

6.2 Temperature-Humidity Cycling Test

Temperature	-40 ± 2 °C to 75 ± 2 °C
Humidity	From 2 to 32°C, maintain a constant humidity: 80 ± 2 % RH; From 32 to 75°C, maintain a constant humidity ratio of 0.024lb. of water per lb. of dry air; (Corresponds to 80 % RH at 32°C and 10 % RH at 75 °C) Below +2°C, humidity is uncontrolled
Test length	14 days (336 hours)

6.3 Water immersion Test

Water temperature	43 ± 2 °C
Water PH value	5.5 ± 0.5
Test length	7 days (168 hours)

6.4 Vibration Test

Amplitude	1.52mm
Frequency	10—55—10 HZ
Test length	2 hours/each plane, total 3 planes

6.5 Side pulling Test

The load applied angle	90°
Load weight	0.5 - 1 lb
Test length	10 seconds/port

6.6 Cable Retention Test

Load weight	1 - 2.2 lb
Test length	1 minute/port

6.7 Impact Test

Drop height	1.8 meters
Withstand number	8 drops per axis, total 3 axes

7. Pass/fail criteria

Parameters	Allowable value after test
Upper stability insertion loss (1% port)	21.60 dB
Lower stability insertion loss (1% port)	18.20 dB
Upper stability insertion loss (99% port)	0.30 dB
Lower stability insertion loss (99% port)	0.03 dB

8. Test Procedures

Note: IL is the acronym of Insertion Loss.
 USL is acronym of Upper Stability Loss.
 LSL is acronym of Lower Stability Loss.

8.1 Temperature-Humidity Aging Test

10. Conclusion

Eleven devices were randomly picked as samples and tested during this qualification test. The test results reported in this document demonstrate that PuHuiXing technology optical fiber splitter couplers meet the reliability assurance requirements specified in TELCORDIA GR-1209-CORE .

PuHuiXing Technology Co., Ltd is committed to ensure that continual process improvements and periodic surveillance qualifications will continue to be performed on this product family.
